About

Front-End Engineer with 11+ years building high-traffic web applications (1M+ daily users) for SaaS, travel, and classifieds platforms. Specialized in React, legacy system migrations, performance optimization, and product observability. Proven track record leading migrations that cut build times by 30+ minutes and enabled 1,000+ additional daily bookings. Cross-functional experience with product, design, backend, and analytics teams.

Work Experience

Distillery (Rocketmiles by RocketTravel) — Jan 2021 – Present

Tech Lead / Senior Front-End Engineer

Led the full migration from AngularJS 1.8 to React for millions of daily users across major airline partners, improving Developer Experience, maintainability, and user experience. Owned the front-end team's observability and experimentation strategy.

Parallel Staff (Intrado Project) — Jan 2020 – Mar 2021

Senior Front-End Engineer

Led front-end development for a video-first meeting platform, delivering custom branding, multi-monitor previews, screen sharing, and participant management.

Wizeline — Oct 2018 – Mar 2020

Software Engineer II (Front-End)

Built fintech products and enterprise training programs, combining product development with technical knowledge transfer.

Segundamano (Adevinta Group) — Aug 2015 – Sep 2018

Front-End Engineer

Modernized high-traffic classified pages and revamped the payment funnel for Mexico's largest classifieds platform.

Education

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM) — Aug 2009 – May 2014

B.S. in Computer Science

Projects

begodev.io

Professional portfolio and technical blog. Minimalist Astro architecture optimized for performance and SEO. Self-hosted on own VPS.

Astro + MDX architecture with i18n (ES/EN) | Full-stack project portfolio | Self-hosted on own VPS with CI/CD

Resume

Interactive bilingual CV built with Astro + Preact. Print support, language switching, and command palette.

Astro + Preact islands architecture | Bilingual (ES/EN) with localStorage persistence | Print-optimized and JSON Resume schema-based

Cronio

Smart workout timer app. AI-powered routine configuration (EMOM, AMRAP, intervals). Shareable routines via unique links.

Next.js + TypeScript + Supabase | AI-powered routine configuration | Shareable routine links

AAOS

AI Agent Operating System orchestrating 10+ specialized agents (nutrition, training, analytics, DevOps) through a centralized Supabase blackboard, n8n automations, and Claude as runtime.

10+ specialized agents with Claude Code | Centralized blackboard (Supabase + n8n) | Health, training, and ecommerce pipelines

Angievaz.shop

Full-stack ecommerce platform with admin panel. Product, inventory, and order management. Conversion-optimized design.

Full-stack ecommerce with admin panel | Inventory and order management | Conversion-optimized design
